IDEAL LITHOGRAPHIC FRIEZES

Presenting careful reproductions of paintings by eminent artists, adapted for use as friezes either continuously or in panels.

They are especially decorative and effective when used in connection with harmonious colorings of the very popular plain surfaces such as Grass cloths, Oatmeals, and Munich Fibres.

Being printed in unfading oil colors, by the best lithographic processes, they are most durable and permanent in material, and of constant charm and interest as frieze decorations.

All details as to width, length of repeat, etc. are printed in each miniature. Put up in neat packages containing six sheets or a total length of thirty feet with the exception of the Bewitching Forest, the roll of which contains 6 sections of 46 inches or a total length of 23 feet.

THE DECORATIVE SCENIC PAINTINGS.

The hand painted pastelle scenes shown here are in sheets 3 feet wide by 9 ft. in height and match continuously without repeat to a total length of 300 feet or 100 sheets of each of the ten subjects.

The illustrations show two sheets of each subject, a surface 6 feet wide and about 8½ feet high, the total height being reduced slightly for illustration.

Please note that these scenes can be used in any desired height between six and nine feet, the reduction being made by cutting from the top or sky portion. The complete picture in all subjects being below the six foot line.

Any number of sheets can be furnished, taken consecutively from the 100 sheets, but separate panels or sheets cannot be furnished breaking the continuity of the remaining sheets.

The entire 100 sheets of each subject are harmonious in color and design with the miniatures here shown and may be ordered with the assurance that the panels received will carry out the spirit of each subject in the most perfect and satisfactory manner.

They are priced for single sheets 3 x 9 feet each
